

How Do I Calculate My Individual EMS Levy Tax Amount?

You can estimate what your property taxes will be if you know the total assessed value of your property. If you are unsure of the assessed value, you can look it up on the Lewis County Assessor's Office website at www.lewiscountywa.gov under PATS. You will need your property address or the parcel number.

For example, if the assessed value of your property is \$175,000 and the levy is \$0.50 per thousand dollars of value:

$\$175,000 \times .050\%$ (\$0.50 per thousand) = \$87.50 estimated tax annually

What Types of Properties Are Assessed?

All real and personal property is assessed in the State of Washington unless qualified for exemptions. Real property consists of land and buildings and personal property is machinery and equipment.
